

Diabetes Alliance - Managing the Obese Patient

PHN EDUCATION SESSION

You are invited to join this webinar discussing the health considerations and current options available for the management of obesity.

The session will cover:

- Understanding appetite regulation and weight maintenance
- What diet is best?
- What pharmaceutical options are available in Australia and how do I choose between them?
- The role of metabolic surgery

By the end of this activity, participants will be able to:

1. Advise their patients on diet and weight maintenance.
2. Discuss pharmaceutical options with their patients.
3. Identify the role of metabolic surgery for patients with type 2 diabetes

SPEAKER: DR Judy Luu (FRACP, MIPH, Grad Dip Med Stat)

Dr Luu (FRACP, MIPH, Grad Dip Med Stat) is a senior staff specialist in Endocrinology and Diabetes at the John Hunter Hospital and the Clinical Lead for the HNELHD Diabetes Stream. She holds a conjoint lecturer position with the University of Newcastle. She has many years of clinical experience in managing patients with diabetes and obesity and is a member of the Diabetes and Endocrine Network of the Agency of Clinical Innovation.
