

Optimising your Practice Data to identify patients at risk of cardiovascular disease and assist in driving patient care

PHN EDUCATION SESSION

This Mastermind will assist General Practices in identifying their patients who are at risk of Cardiovascular Disease through the use of their data and a Cardiovascular Dashboard Report. We will go through the benefits of this report and how it can be utilised to drive patient care and ideally assist in reducing the risk of Cardiovascular Disease in the community. It will also show you what support we can provide your practice in the area of Heart Health.

This presentation will discuss the following issues:

- Identify the benefits of a Cardiovascular Dashboard Report
- How to use Practice data to drive patient care
- Using Heart Health as a Quality Improvement activity to assist in improving patient care

SPEAKER: **Kelsie Rolfe** - Kelsie works with in the PHN's Primary Care Improvement Team and is the support lead for Heart Health within the PHN. She has experience working within General Practices as a Registered Nurse and extensive experience in quality improvement activities.
