

Diabetes Alliance Urgent Care: How it works from the General Practice perspective – insights & success!

H N E L H D / P H N E D U C A T I O N S E S S I O N

The Diabetes Alliance Urgent Care model provides timely and accessible diabetes specialty clinical advice, insulin titration assistance and access to Endocrinologist support for General Practitioners (GPs) and Practice Nurses (PNs) working in primary care within the Hunter New England Local Health District.

Understanding the complex nature of Diabetes in adult patients and the demand on general practice, especially during the current COVID-19 pandemic, this service aims to provide prompt advice as management issues arise. Please join us for this informative webinar outlining the service with opportunity for Q&A.

By the end of the webinar, participants will understand:

- How and When to contact the Urgent Care Team
- My Virtual Care – what's required for a successful consultation
- Urgent Care arms of support – advice, insulin titration, urgent referral to case conference.
