

Living with COVID: Post-COVID Conditions & Rehabilitation

PHN EDUCATION SESSION

The longer term health impacts of COVID-19 infection for individuals are becoming increasingly apparent as the pandemic continues. General practice and other primary healthcare providers are likely to be identifying and supporting patients experiencing a wide range of symptoms and conditions following COVID-19 infection. Please join us for this webinar update with opportunities for Q&A.

The presentations will focus on the following topics:

- Epidemiology-global and local experience
- How does Post COVID-19 present
- Management options for respiratory symptoms, fatigue and exercise intolerance
- Indications for specialist assessment
- Describing the symptoms and conditions associated with post COVID-19 conditions
- Best practice rehabilitation and recovery guidelines post COVID-19

General COVID update on:

- Household contact rules
- COVID-19 immunisation changes
- Changes to medication eligibility and prescribing
