

# Living with COVID in HNE: Escalation, Medication and Technology

## PHN & HNELHD EDUCATION SESSION

As we reach target COVID-19 vaccination rates the majority of COVID-19 positive people will be managed in the community and won't require hospitalisation. This webinar will continue the discussion regarding management of COVID-19 positive patients in Hunter New England as we transition into the 'living with COVID' phase of the pandemic across the region.

This session will cover:

- Evidence, current guidelines and local access for: Sotrovimab; Ronapreve; Molnupiravir and the new Pfizer oral protease inhibitor
- Role of inhaled budesonide for symptomatic patients with risk factors for disease progression
- Thresholds for admission and escalation processes
- Demonstration of the new shared care portal for management of the COVID-19 positive patient
- Opportunity for Q & A

**SPEAKERS:** **Conjoint Professor Joshua Davis** (Infectious Diseases Physician, HNE LHD)  
**Dr Scott Twaddell** (Respiratory Physician, HNE LHD)  
**Ian Schumacher** (Manager Clinical Systems, HNE LHD)
