

Chrysalis Wellbeing Series Session 6: Postvention Support

PHN EDUCATION SESSION

The Chrysalis Wellbeing Series of webinars aims to provide information and resources to enhance the mental wellbeing of Primary Care Health Professionals, their patients and consumers. This session will explore postvention, an intervention conducted after a suicide has occurred and usually targeting those bereaved by the suicide including family, friends, professionals, community members, colleagues, and peers. These individuals may be at increased risk of suicide themselves. Postvention aims to increase resilience and help them cope with the loss.

Session Learning Topics:

- What is postvention and the importance of follow up after a suicide
- An understanding of the processes involved after a suspected death by suicide
- Becoming aware of services that are able to support people who are bereaved by suicide
- General Practice role in supporting the family in bereavement.
