

# COVID Vaccinations for Vulnerable Populations Grants

PHN EDUCATION SESSION

To support the Government's COVID-19 response, innovative, local, short-term COVID-19 vaccination activities and strategies are being implemented. These targeted, short-term activities aim to increase access to the COVID-19 vaccination among vulnerable populations who cannot access or have difficulty accessing the vaccine through existing mechanisms.

To provide support to organisations to deliver COVID-19 vaccination services including boosters, to vulnerable populations, Hunter New England and Central Coast Primary Health Network (the PHN) has community grants available from \$10,000 - \$250,000 for eligible activities.

This information session is to provide an overview of the grant round including eligible activities, timelines, and the application process.
