

# Caring for COVID-19 Positive Patients in the Central Coast Community

## PHN & CCLHD EDUCATION SESSION

This webinar will discuss the management of COVID-19 positive patients (both children and adults) in the Central Coast region, from when they are first diagnosed to when they are released from home isolation.

### The session will cover:

- A proposed shared care model for general practice involvement in caring for COVID-19 positive patients in collaboration with CCLHD COVID-19 care teams.
- How the CCLHD COVID-19 care teams decide the type of care a patient receives.
- The role of the patient's GP/General Practice and communication with GP/General Practice team.

There will also be a Q&A component.

### Learning objectives – By the end of this session participants will be able to:

- Understand the care provided for COVID-19 positive patients in the Central Coast region.
- Discuss the role of General Practice in caring for their patients with COVID-19.
- Introduce the shared care model into General Practice.
