

Community Management of COVID-19 in Hunter New England

PHN / HNELHD EDUCATION SESSION

This webinar will discuss the patient's journey (both children and adults) from when they are first diagnosed with COVID-19 to when they are released from isolation and given a clearance certificate in the Hunter New England Local Health District. Presentations will be given by specialists from both the paediatric and adult COVID-19 *Hospital in the Home* teams as well as one of the GPs working in the adult team.

The session will discuss:

- the current options for care
- how the HNELHD Covid Care in the Community team decide the type of care a patient receives
- the role of the patient's GP and communication with the GP

Learning objectives - after this session GPs will be able to:

- Understand the care provided for COVID-19 positive patients in the HNE LHD
- Understand the GPs current role in caring for patients with COVID-19

There will also be a Q&A session for any unanswered questions.
