

# Digital Health Tools for Specialists

## PHN EDUCATION SESSION

The Primary Health Network is very pleased to showcase a range of innovative Digital Health tools that will transform your practice by saving you both time and money while supporting your patient's healthcare journey.

Information will be provided on the foundational requirements for specialist practices to access My Health Record.

At the end of this session, attendees will be able to:

- Recognise the benefits of My Health Record and what's in it for your practice and patients.
- Identify the privacy and security requirements for accessing My Health Record.
- Name the foundational requirements for using Digital Health in practice, including PRODA, HPOS and NASH PKI certificates and where to obtain support for these.
