

# Embedding & Optimising a Medical Practice Assistant in General Practice

## PHN & UNEP EDUCATION SESSION

### Please Join us for a Workshop for MPAs and their Practice Managers

With the pressures that are on the general practice workforce at present, MPAs are a valuable resource! With skills to support both clinical and administrative areas, MPAs have the potential to increase practice capacity by creating space for other staff to work to top of their scope.

HNECC PHN wants to support MPAs and their practice managers to utilise and embed the skills they've developed in training. To help with this, HNECC PHN are running this online workshop for MPAs and their PMs to attend together. The interactive workshop is designed as professional development to help you understand the scope of work that an MPA can perform and the ways they can be effectively utilised within the practice team. Content will include screening and use of Practice data, and brief updates on spirometry and wound care. There will also be business cases presented that highlight how to optimise the MPA role and opportunities for Q&A.

With an ever-growing workforce of qualified MPAs in the NSW PHN catchment (approximately 140) this will also be a great opportunity to network, share ideas and learn from one another.
