## Mental Illness in Children (under 12 years of age) with a Developmental or Intellectual Disability

PHN EDUCATION SESSION

Join Professor Kenneth Nunn for an educational session about children with intellectual or developmental disabilities and anxiety.

### LEARNING OUTCOMES:

1. Identify anxiety and developmental or intellectual disability in Clinical Practice for children under 12 years of age
2. Outline the most common and serious mental illnesses
3. Review strategies for the common disorders
4. Review resources and pathways for management

**SPEAKERS:** **Professor Kenneth Nunn** is a Senior Specialist in Paediatric Neuropsychiatry and General child and Adolescent Psychiatry. He is also senior Consultant in the Elver Statewide Child Trauma and Mental Illness Team for those in out of home care. With 46 years practicing medicine, he is currently developing the area of Infant and Toddler Neuropsychiatry with a view to early intervention to prevent or ameliorate autism and intellectual disability together with the early diagnosis of FASD and traumatic brain injury. He is part of a research group looking at helping families with children with dementia and other severe life limiting disorders.

**Olivia Gregg:** Clinical Nurse Consultant (CNC1) GPLO, Child and Adolescent Mental Health (CAMHS), Central Coast Local Health District (CCLHD)

**WHO:** General Practitioners, GP Registrars, Practice Nurses & Aboriginal Health Practitioners/Workers

**WHEN:** Thursday 7<sup>th</sup> March 2024

**TIME:** 6.00pm – 7.00pm
