Rural Update for Stroke – Hyperacute Interventions (RUSH-IN)

PHN EDUCATION SESSION

The purpose of the event is to highlight the benefits of urgent stroke identification and treatment. The aim is to provide information and education on Hyperacute Stroke Management, inform local clinicians of the assessment and management process and Telestroke update.

Learning Objectives

- A specialist stroke team will provide interactive information sessions relevant to your local community and practice.
- Engagement between service providers and local clinicians.
- Focus on multidisciplinary team to optimise patient outcomes.
- Changes to hyperacute stroke model of care, introducing NSW Statewide Telestroke
- Explaining processes required to deliver a Telestroke Service with a multidisciplinary approach
- Post stroke care by GPs

SPEAKERS: **Dr. Carlos Garcia Esperon** is a stroke neurologist and early career researcher at John Hunter Hospital. He is currently undertaking a PhD program at the University of Newcastle focussing on the implementation of multimodal CT in acute stroke treatment. He has presented extensively in regional and rural centres in NSW on the role of telethrombolysis in stroke management, educating healthcare practitioners in its role in acute stroke treatment.
