

Quality referrals delivered securely  
*eReferral SeNT every time*

# SeNT eReferral Live Demonstration Session

PHN EDUCATION SESSION

Please join us for a half hour education session with our Digital Health Team on SeNT eReferrals. This session will be a live demonstration of the end to end eReferral process from creation of SeNT eReferrals by a GP to receiving and processing them as a Commissioned Service Provider.

The Primary Health Network (PHN) and Hunter New England Health have partnered with the SeNT eReferral software vendor, BPAC Clinical Solutions, on a project to improve the way referrals are received and processed due to the increasing unreliability and insecurity of fax transmissions. The SeNT eReferral project commenced in 2016 and has progressively been implemented across the Hunter New England region. Over 90% of general practices in the Hunter New England region have the capability to send SeNT eReferrals and to date over 100,000 eReferrals have been created and delivered securely. PHN Commissioned Service Providers are able to register to be listed in the SeNT eReferral software and receive SeNT eReferrals.

**SPEAKERS:** Peter Mullen, Digital Health Officer, The PHN
