

Webinar - Gender Affirming Care

PHN EDUCATION SESSION

Trans and gender diverse people are part of the normal diversity of human experience. However, they still face discrimination within society including within the healthcare sector – with significant effects on psychological and physical health. GPs and health professionals can play an important role by providing safe gender affirming care, which will improve physical and mental health outcomes.

This session will give an overview of gender affirming care for GPs, including best practice guidelines, the informed consent model and an overview of prescribing gender affirming hormone therapy for trans and gender diverse patients.

SPEAKERS Dr Sujata Allan, General Practitioner, Armajun Aboriginal Health Service

Associate Professor Katie Wynne, Senior Staff Specialist in Endocrinology at John Hunter Hospital

Dr Jo Measure, Sexual Health Physician, Newcastle Community Health Centre

WHO GPs, Registrars, Nurses, Aboriginal Health Practitioners/Workers

WHEN Thursday, 30th May 2024
