

Sustainability and Viability Initiative (SAVI)

PROJECT BENEFICIARIES

All of region.

IDENTIFIED REGIONAL HEALTH NEED

Support access to
general practice services
and address regional
workforce vulnerabilities,
maximising quality of care.

PROJECT AIM

The project aims to deliver quality partnerships with external stakeholders to broaden the PHN funding base resulting in greater growth and impact in primary care across the region creating lasting positive change in health outcomes.

2023/2024 PROJECT OBJECTIVES

1. Develop a tool for general practice that enables them to easily assess their practice's sustainability and viability.
2. Develop a nation-leading tool that allows practices to measure their ongoing sustainability and viability using predictive analytics and what if - type scenarios.
3. Identify and develop a suite of activities that helps general practices address gaps in areas of finance, workforce, and quality for the purpose of improving their sustainability and viability.

CLINICAL AND COMMUNITY GUIDANCE REQUIREMENTS

An expert advisory group
of subject matter experts
will be established
and consulted.

PROJECT PARTNERS

- External stakeholders
- Expert advisory group
- External consultants and software developers

RESPONDING TO WHICH STRATEGIC CHALLENGE

Enhance the primary
care workforce and
incorporate digitally
assisted services.
