COVID-19: The Virus, The Vaccines, The Facts. Keeping Aboriginal Communities Informed Session 2 – What Happens if you get COVID

PHN / HNELHD EDUCATION SESSION

Hunter New England Health (HNELHD) and the Primary Health Network (PHN) have partnered to deliver a series of educational webinars to help inform people about the facts on COVID-19, the vaccines and the local response to support Aboriginal communities.

This session will focus on what happens if you or your family are a close contact or a positive case. The panel of local leads and health workers will talk through the Public Health response, the supports for our Aboriginal communities and share their experiences with supporting families and communities. It's an opportunity to ask those burning questions to help keep you, your family and your community safe.

SESSION 2 - WHAT HAPPENS IF YOU GET COVID?

How COVID-19 is spreading in Aboriginal communities, What can happen if you become COVID positive or a close contact? HNE support for communities out West, Questions & Answers discussion panel
