#### METHODOLOGY

In cases where there are multiple MMM classifications for a suburb, MMM classification represents the classification with the largest population within the suburb, based on 2011 census population data. For example, the suburb of Aberdeen in NSW has two MMM classifications of 4 and 5. The region of the suburb classified as MMM classification 4 has a population of 1,825, while the region of the suburb with an MMM classification of 5 has a population of 284. As the majority of the population resides in the region of Aberdeen classified with an MMM of 4, the MMM classification of 4 is allocated to Aberdeen.
