Are you about to prescribe an antidepressant? The ALIGNED study may help tailor drug selection and dosing based on your patient's genetics.

Eligibility Criteria:

Individuals may be included in the study if they meet the following criteria:

- Aged between 18 and 80 years (inclusive)
- Sufficiently fluent in English
- Live in Australia
- Have depression
- Person in whom antidepressants are indicated based on the current ANZ guideline, but are yet to be initiated during current episode OR ceased antidepressant \geq 30 days ago OR considering changes to antidepressants
